

## Spotlight on Control: The MeshTek BLE Remote by BlueHopper

The [MeshTek BLE](#) remote puts you in complete control of your BlueHopper year-round, programmable outdoor lighting experience. The BLE remote gives you fast, easy access to some popular features that are easy to navigate—no need to access your mobile. Just press a button and control your lights instantly.

The BLE Remote features a 40-button layout, designed for full, hands-on control of your year-round outdoor lighting. With easy access to effects, presets, colors, scenes, and more, you can manage your lights wirelessly—no smartphone or application needed.

### Key Features:

- **Wireless Convenience:** Powered by Bluetooth Low Energy (BLE) technology, it offers direct, instant control of your entire lighting system.
- **Compatible with All Lighting from BlueHopper:** BLE remote is fully compatible with all BlueHopper lighting systems.
- **10-seconds commissioning:** Experience effortless setup with our 10-second commissioning—your BlueHopper lighting system is ready to go almost as soon as it's powered on.
- **Dynamic Adjustments:** Switch the lights ON/OFF, control speed, adjust brightness levels, and create the perfect ambiance with just a few button presses.
- **Customizable Effects:** Choose from the selected and most popular effects, or apply your favourite whites and colours.
- **Compact Design and State-of-the-Art Firmware:** The remote features a sleek design and operates on a replaceable battery, built for style and durability, with a lifespan of 2 years. The firmware running on it provides extensive control value.

### Simple. Smart. Seamless.

It's a perfect tool for professional installers, homeowners, and business owners in the BlueHopper outdoor lighting ecosystem.

BlueHopper Installers can get the BLE Remote from the [BlueHopper Store](#) or your distributors.
