

BLE-ETHERNET- WiFi-CELLULAR GATEWAY

It accomplishes 3 important functions:

**Remote
Control**

**Simultaneous
Multi-User Control**

**Control lights with
AI integration.**

The MeshTek Gateway is a BLE-WiFi-Ethernet Gateway, with optional cellular connectivity. It allows users to control and monitor MeshTek enabled devices from intuitive iOS, Android and Web Apps. It allows local control, and remote control when internet connection is available.

Features and Advantages:

**Fast and Secure IoT Connectivity
for Data Acquisition and Visualisation**

**Multiple Connection
Protocols Supported**

**Control up to 1000+ MeshTek
Devices in One-to-Many Networks**

**Retains Schedule even with
Network Outages**

**Ready Backend Server and
Optional Cellular Connectivity**

**Control, Monitor, and Schedule
Remotely with Simple
Web, iOS, and Android Apps**

General Specifications:

Input Supply Voltage	5VDC
Input Supply Current	1200mA
Protocols	Ethernet, Wi-Fi, BLE, Cellular
Open Air Control Range	Up to 200m
Certifications	FCC, IC
Operating Temperature	-10 °C to 60 °C
Dimensions	90x90x28 (mm)
